Subject: Re: Method 5035 for Case 33178

ORIGINAL

The soil VOA samples were collected by inserting 5g of soil in three pre-weighed 40 mL VOA vials with no preservative other than ice. An additional jar of sample was collected for soil moisture determination.

for Case 33178

Case: 33178  
Site: New Jersey Fireworks

RPM: Lorie Baker 3HS34  
cc: Peggy Smith MDE

ORIGINAL

Based on available information it is not clear if volatile soil samples in case 33178 were collected in Encore tubes per method 5035. Please clarify.

Thanks
